

BNV offers niche consulting solutions for mineral resource development clients

- Scoping and feasibility studies
 - Project management
 - Estimating & cost control
 - Schedule planning
- Contract and procurement strategy & management

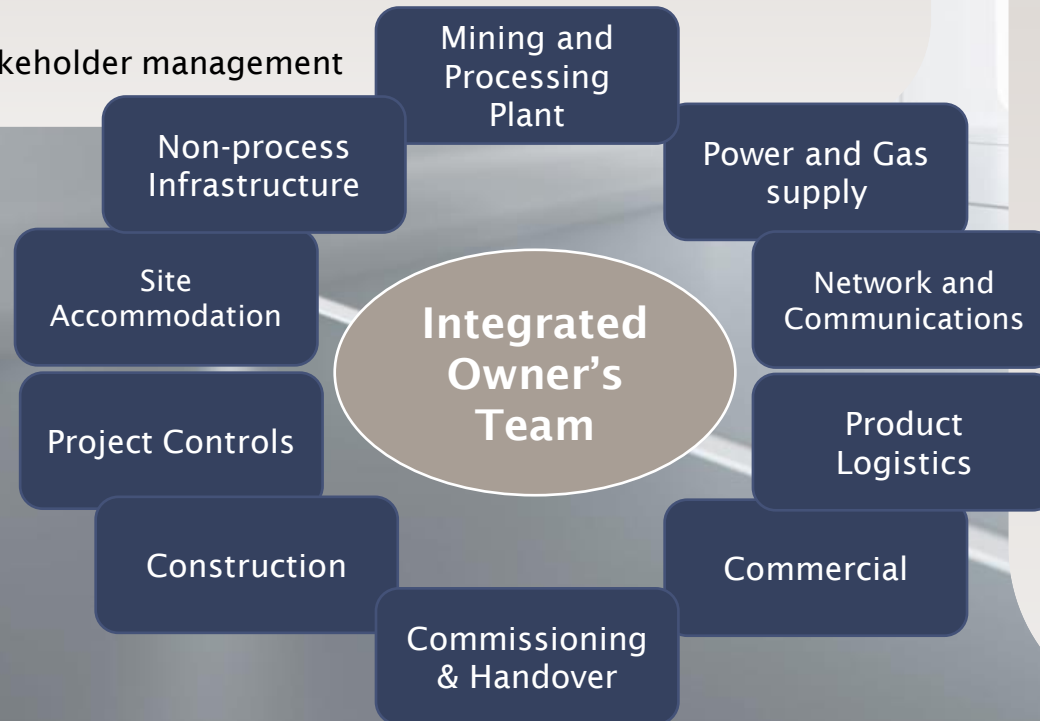

WHAT WE DO

Owner's Team Representatives

BNV works with the owner's team to conceptualise and scope the project to optimise the business case, capital and operating costs through a client-centred and collaborative approach. BNV will drive strategic planning integrated with extensive project execution capabilities covering specific services:

- Project implementation options
- Identification and analysis of alternate execution strategies
- Stakeholder identification and collaboration
- Coordination of study consultants
- Identify potential implementation partners
- Produce conceptual schedule and indicative cost data
- Financial modelling
- Communication and stakeholder management

Project Management Services

BNV's proven project management experience to manage the following facets:

Schedule

- Using advance level Primavera P6™ or MS Project™ experience, develop the project schedule to analyse and understand risk drivers and recommend mitigation strategies
- Monitoring, prediction, control and reporting of schedule and management of earned value.

Estimating and Cost Management

- Estimating project cost to industry benchmarks (AACE) at conceptual, scoping, feasibility and definitive levels.
- Cost management, forecasting and reporting
- Assessment of variations
- Mitigation of cost risks

Contract and Procurement Management

- Development of procurement and contracting plans
- Contract preparation and negotiation
- Management of tender process, evaluation and recommendation of tenders
- Contractor daily management
- Change management process
- Dispute negotiation and mediation

Risk Management

- Facilitation of risk reviews for stakeholders
- Risk management plan development
- Sensitivity and scenario analysis to determine influence of uncertain parameters on project schedule and cost

OUR VALUES

EXPERTISE

Using knowledge and experience to navigate complexities and produce solutions that exceed expectations.

SAFETY

Prioritising what matters most in all that we do by identifying and taking responsibility for tasks that will delivery safer outcomes.

QUALITY

Dedication in delivering excellence beyond meeting specifications. Focus on reliability, innovation and continuous improvement with a long-term mindset.
